PROFESSIONAL SUMMARY

Principal Engineer and product builder with 11+ years taking products from first commit to real users. I lead a 15-engineer team at Livlong 365, a healthtech platform spanning telehealth, diagnostics, and pharmacy, and still spend about 60% of my week writing production code. Recent launches: the livlong.com rebuild from WordPress to Next.js (Lighthouse 65–70 to 98–99, SEO 100), a lab-test marketplace, company-wide internal portals, and AI products in production, including a voice-calling AI chatbot and AI agents across CRM, email, and WhatsApp. Promoted from Team Lead to Principal Engineer in two years and named “Leader of the Year.”

CORE SKILLS

Product Delivery: 0→1 Product Builds, Shipping to Production, Platform Migrations, Web Performance & SEO, Internal Tools

Technical: React.js, Next.js (SSR/SSG), TypeScript, Node.js (Express, Hono), Python, PostgreSQL, Docker, AWS (EC2, S3, CloudFront, Route 53, ACM), Angular, Socket.io, Tailwind CSS

Applied AI: LLM Integration, AI Chatbots & Voice AI, AI Agents (CRM / Email / WhatsApp), AI-Assisted Development Tooling

Leadership: Technical Lead for a 15-Engineer Team, Architecture & Technical Direction, Mentoring, Stakeholder Management, Hiring & Team Growth

PROFESSIONAL EXPERIENCE

Livlong 365 (Livlong Protection & Wellness Solutions) — Mumbai / Gurugram, India

Principal Engineer

Apr 2024 – Present

- Built the lab-test marketplace and servicing portals for livlong.com, including a diagnostics module with millisecond-level response times.
- Migrated livlong.com from WordPress to Next.js (SSR/SSG), lifting Lighthouse performance from 65–70 to 98–99 and SEO to 100.
- Built and shipped a production AI chatbot with voice calling, writing the conversation flows, LLM integration, and voice pipeline myself (Python, Node.js, TypeScript, Docker).
- Built internal AI agents integrated with CRM, email, and WhatsApp that automate repetitive work for business teams, and drove adoption of AI coding tools and internal CLIs across engineering.
- Lead a 15-engineer team across React, Node.js, and PostgreSQL on AWS: set technical direction, manage stakeholders, and mentor engineers, several of whom have moved into leadership roles.

Team Lead

Sep 2021 – Mar 2024

- Built livlong.com, a customer-facing healthcare platform, with Next.js (SSR/SSG), React, and Tailwind CSS.
- Architected applications for white-label reuse ahead of later multi-brand needs.
- Built internal portals adopted company-wide for onboarding, operations, and agent workflows, giving leadership visibility into team and ops tracking.
- Led a 9+ member frontend engineering team; awarded “Leader of the Year.”

nurtr — Gurugram, India

Senior Full Stack Developer

Oct 2018 – Mar 2021

- Designed and led the migration from a monolith to microservices.
- Built core services, including JWT-based authentication, Products, Orders, and Transactions, plus notifications (SMS via Twilio, email via AWS SES).
- Built real-time features with Socket.io for live chess puzzles and ran infrastructure on AWS (EC2, ELB, S3, Route 53, CloudFront, ACM).
- Mentored and grew a team of 4 engineers (2 frontend, 2 backend).

Full Stack Developer

Oct 2017 – Sep 2018

- Joined as one of the first engineers and built the company’s first product, live chess classes, from scratch.
- Built MVPs, internal tools, and campaign landing pages, working directly with the CTO, business, and marketing as the team scaled.

Software Engineer — Mindtree, Pune, India

Mar 2015 – Sep 2017

- Built Node.js backend services and internal portals as an early Angular 2 and TypeScript adopter; led Angular 2 knowledge-sharing; awarded “Best Team Player” and “A Player.”

EDUCATION

B.Tech, Computer Science and Engineering — JSS Academy of Technical Education

Aug 2010 – Jul 2014
